

## 2022 Grand Design Reflection 337RLS

Bedroom slide out wiring diagram for wires located under the bed storage area and susceptible to being disconnected.

- Turn off lights above the bed and external blue lights below the slide out
- Disconnect 12-volt power to the trailer
- Remove bottom board of storage area to access wires
- Make the proper connections per the diagram and secure wires to the floor
  - You can slit the rug and put the ends under the rug and use mounting cable-ties screwed down to secure them
- Ensure the casters are firmly mounted to the bed frame as they tend to rotate and reduce clearance
- Check Power Center 7.5 Amp fuse and replace if blown
- Turn on 12-volt power to the trailer and test light switches
